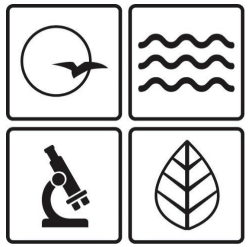
CENSUS OF MISSOURI PUBLIC WATER SYSTEMS 2026



Missouri Department of Natural Resources
Division of Environmental Quality
Water Protection Program
Public Drinking Water Branch

PREFACE

The Missouri Department of Natural Resources is pleased to publish the 2026 edition of the annual Census of Missouri Public Water Systems. This publication provides detailed information about Missouri public water systems including information regarding supply capacity, source water type, population served, select monitoring results, and types of treatment being used. The department hopes this publication will serve as a useful reference for anyone needing information about a Missouri public water system.

While the Census provides summary information about individual water systems, additional resources are also available. Our Annual Compliance Report of Missouri Public Drinking Water Systems lists violations by individual water systems as well as statewide data for the calendar year and is available at: https://dnr.mo.gov/water/hows-water/water-we-drink/drinking-reports/compliance

In addition, the complete results of all the chemical analyses taken at public water systems are on file at the office of the Missouri Department of Natural Resources' Public Drinking Water Branch. This information is also available online on our Drinking Water Viewer webpage and can be viewed at: https://modwv.gecsws.com/

Also, individuals can learn more about their water system by accessing their community water systems' annual Consumer Confidence Report at: https://dnr.mo.gov/ccr

For questions about this document, you may call the Department's Public Drinking Water Branch at 800-361-4827 or 573-751-5331.

For more information on the department, visit dnr.mo.gov or call 800-361-4827.

For statewide environmental emergencies, call the department's 24-hour Environmental Emergency Response at 573-634-2436.

II. STATISTICAL INVENTORY INFORMATION

STATISTICAL INVENTORY INFORMATION
INTRODUCTION

The statistical inventory information section contains two tables. The first table gives the number of regulated systems by region and system type. The second table contains system totals and population totals by source type.

Number of Regulated Systems By Region and System Type

Region	Number of Community Systems	Number of Nontransient, Noncommunity Systems	Number of Transient, Noncommunity Systems	Total Number of Systems
CENTRAL FIELD OPERATIONS CFO	157	25	280	462
KANSAS CITY REG OFFICE KCRO	245	7	58	310
NORTHEAST REG OFFICE NERO	202	6	10	218
SOUTHEAST REG OFFICE SERO	239	54	180	473
SOUTHWEST REG OFFICE SWRO	381	91	500	972
ST. LOUIS REG OFFICE SLRO	203	39	130	372
Total Systems	1,427	222	1,158	2,807

Community Water System Populations

Source Type		
Primary Groundwater		
Systems using Groundwater	1,044	1,967,568
Primary Surface Water		
Systems using Groundwater Under Direct Influence	3	13,289
Systems using Surface Water - Streams	57	2,543,589
Secondary		
Secondary System using Groundwater	155	212,429
Secondary System using Groundwater Under Direct Influence	2	16,281
Secondary System using Surface Water	166	897,753

III. COMMUNITY WATER SYSTEM INVENTORY INFORMATION

COMMUNITY WATER SYSTEM INVENTORY INFORMATION
INTRODUCTION
KEY TO CODES AND ABBREVIATIONS

The community water system inventory information section contains data on community public water systems regulated by the Missouri Department of Natural Resources' Public Drinking Water Branch. A community public water system serves at least 15 service connections and is operated on a year-round basis or regularly serves at least 25 residents on a year-round basis (Missouri Safe Drinking Water Regulations 10 CSR 60-2.015). These systems include, but are not limited to, cities, water districts, subdivisions, mobile home parks and institutions.

Community water system inventory information provides basic information such as the required water system operator level and the required distribution system operator level, the year the system began providing water, the ownership type, the number of people served and the number of service connections. These systems are divided by type of community into three alphabetical lists. The first list contains city systems, the second list contains water district systems and the third list contains subdivision, mobile home park, institution and miscellaneous systems. This section also provides a list of systems that sell water and whom they sell to, as well as a list of systems that buy water and whom they buy from.

AVG = Average
MGD = Million Gallons per Day

DISTRIBUTION SYSTEM OPERATOR LEVEL (Listed second, if available under Operator Level, Example: "A1" or " 1"):

1 – Requires a minimum of one-half year of distribution operations experience. 2 – Requires a minimum of 1 year of distribution operations experience.
3 – Requires a minimum of 3 years of distribution operations experience.

Both the water system operator level and the distribution systems operator level for community public water systems are classified according to system capacity, source of water, character of water, character of water being produced, complexity of treatment and other physical conditions that may affect a system. The department uses this classification system to determine the certification level necessary for the chief operator to supervise the operation of a facility (Missouri Safe Drinking Water Regulations 10 CSR 60-14.010).

OWNER TYPE: F – Federal Government P – Private
S – State Government L – Local Government

SOURCE WATER PERCENTAGES:
PCT GRD = Percent of Source that is Groundwater
PCT PUR GRD = Percent of Source that is Purchased Groundwater
PCT PUR SUR = Percent of Source that is Purchased Surface Water
PCT SUR = Percent of Source that is Surface Water
PCT GW UNDER INFL = Percent of Source that is Groundwater under influence of Surface Water
PCT PUR GW UND INFL = Percent of Source that is Purchased Groundwater under influence of Surface Water

IV. NONCOMMUNITY WATER SYSTEM INVENTORY INFORMATION

NONCOMMUNITY WATER SYSTEM INVENTORY INFORMATION
INTRODUCTION

The noncommunity water system inventory information section contains data on noncommunity public water systems regulated by the Missouri Department of Natural Resources' Water Protection Program, Public Drinking Water Branch. There are two types of noncommunity public water systems. One type of noncommunity public water system is a transient noncommunity public water system. This is a public water system that is not a community water system, which has at least 15 service connections or regularly serves an average of at least 25 individuals daily at least sixty days out of the year (Missouri Safe Drinking Water Regulations 10 CSR 60-2.015). This means that for the most part, the population changes daily. These systems include, but are not limited to, recreational areas, restaurants, highway rest areas, hotel/motels, campgrounds, etc. The second type of noncommunity public water system is a nontransient noncommunity public water system. This is a public water system that is not a community water system and that regularly serves at least 25 of the same persons over six months per year (Missouri Safe Drinking Water Regulations 10 CSR 60-2.015). This means that for the most part, the same population returns daily to the facility. These systems include, but are not limited to, factories, large businesses and industries, schools, etc.

Noncommunity water system inventory information contains a complete listing of active noncommunity water systems. This list contains the system name, county of location, system identification number, system type and season begin and end dates. The noncommunity listing is first by county and then alphabetical within the county.

Noncommunity Water Systems

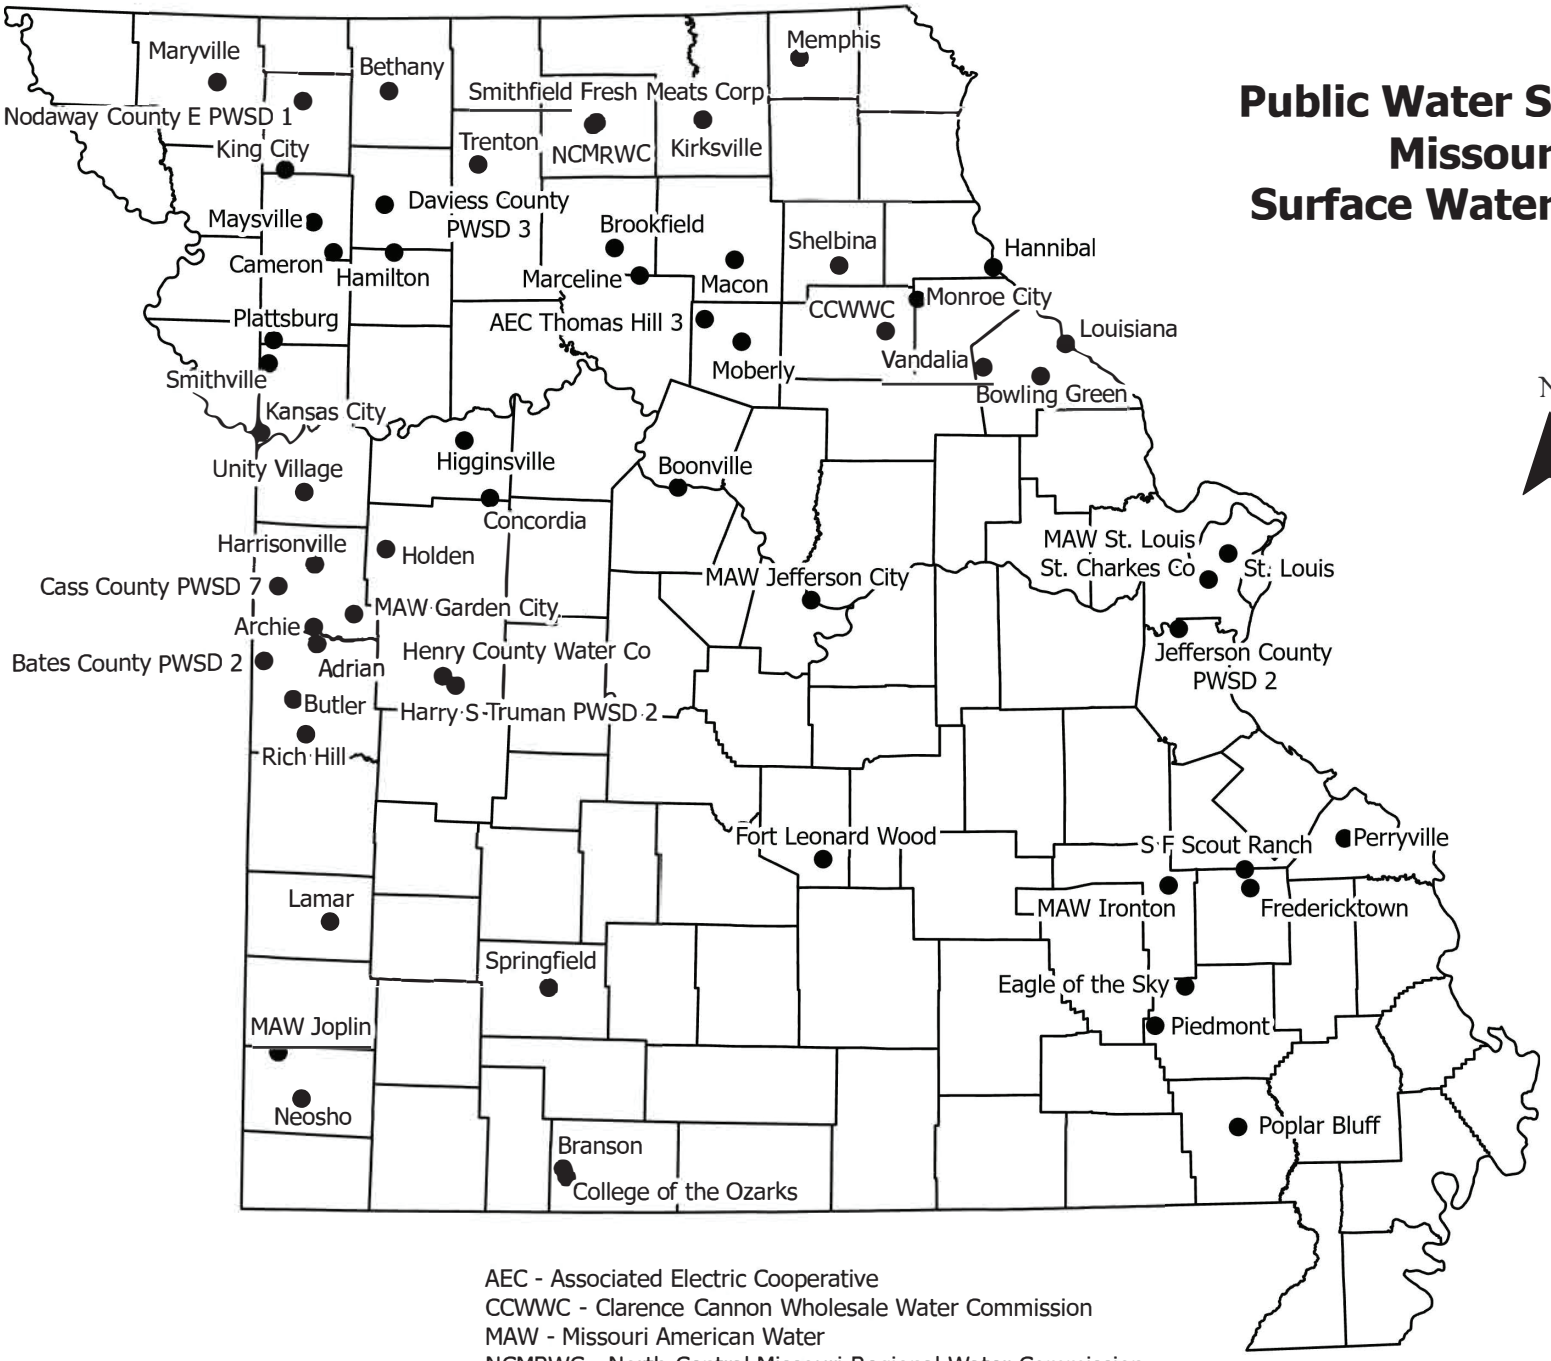
VI. SURFACE WATER SOURCE INFORMATION

SURFACE WATER SOURCE INFORMATION
INTRODUCTION

The surface water source information section provides a map of Missouri's surface water systems. The intake location table is by river name and then alphabetical within the river name.

Public Water Supplies of Missouri: Surface Water Systems



AEC - Associated Electric Cooperative
CCWWC - Clarence Cannon Wholesale Water Commission
MAW - Missouri American Water
NCMRWC - North Central Missouri Regional Water Commission
PWSD - Public Water Supply District

VII. CHEMICAL ANALYSES OF COMMUNITY WATER SYSTEMS

CHEMICAL ANALYSES OF COMMUNITY WATER SYSTEMS
INTRODUCTION
KEY TO CODES

The chemical analyses of community water systems section contains data on inorganic chemical (IOC) test results. Under Missouri's Public Drinking Water Regulations (10 CSR 60-4), water systems are required to have samples collected and submitted to a certified drinking water laboratory for analyses. Water systems utilizing surface water sources are required to sample every year for IOC analyses while those utilizing groundwater sources are required to submit samples once every three years. Monitoring requirements for certain contaminants have been reduced to less often than once per year because the concentrations of these contaminants are not expected to vary significantly from year to year and are considered representative. All active water sources are required to sample annually for nitrates. These analyses are performed by the Missouri Department of Natural Resources' Environmental Services Program or other certified drinking water laboratories. Results are given in this section for a group of common IOCs and the value provided represents the most recent sample for the chemical contaminant. If no result is listed, the water system has not been sampled for the specified chemical. This may be because the water system is newly activated, or the water system has recently been reclassified as a community water system and results were not available at the time of this report.

Below is a list of chemical contaminants included in this section. In parentheses behind some of the contaminants are suggested upper limits or regulatory maximums in milligrams per liter (mg/L) also known as parts per million or micrograms per liter (ug/L) also known as parts per billion. In addition to the listed chemicals, analyses were also completed for the following inorganic chemical contaminants: arsenic, barium, cadmium, chromium, lead, mercury, selenium, and thallium. The results of all chemical analyses are on file in the office of the Missouri Department of Natural Resources' Public Drinking Water Branch and can be viewed at https://modwv.gecsws.com/. Results that are below the detection limit are marked as not detected or "ND". The results in the following tables are listed in terms of either mg/L, ug/L, or in the case of pH, standard units.

Milligrams per Liter (mg/L)

Alk – Alkalinity (as CaCO3)
Ca – Calcium
Cl – Chloride (250)
F – Fluoride (2.0 & 4.0)
K - Potassium
Mg - Magnesium
Na - Sodium
NO3 – Nitrate (10)
SO4 – Sulfate (250)
TDS – Total Dissolved Solids (500)
TH – Total Hardness

Micrograms per Liter (ug/L)

Al – Aluminum (50-200)
Cu – Copper (1,000)
Fe – Iron (300)
Mn – Manganese (50)
